Subject ADSL2 MIB version 1.11

Hi,

Attached is a new revision of the ADSL2 MIB design.

The main changes I implemented are:
- Updated default values (alignment with minutes of meetings)
- Removed the actual and previous aggregate data rate objects.
- Added LastExceptionCode status proprietary object
- Added changes according to the pre-published G.997.1 amendment 1 (It also solves the issue of
  G.992.3 Annex L transmission modes)
- Other minor changes

Best regards,
Moti Morgenstern
